EWU Cyber Policy Hackathon

Online voting challenge

Overview

You work for a state representative and they have been hearing their constituents talk about online voting (Internet voting) for public officials and need guidance. They are hesitant to make a statement without more facts and remember reading about a student being investigated by the FBI for probable hacking and provided you with a reference to the story.

As an expert, you must advise them on: the pros and cons of using online voting technology, a public statement, and policy that should be pursued regarding what you discover.

Resources

Aside from the link above, they provided you with some resources that require your expertise, sent in by various concerned citizens.

1. An academic study titled: *The Ballot is Busted Before the Blockchain: A Security Analysis of Voatz, the First Internet Voting Application Used in U.S. Federal Elections.*
2. A news piece about online voting.
3. A Consensus study report titled: *Securing the Vote: Protecting American Democracy.*
4. A study that talks about online voting and the blockchain, *Going from bad to worse: from Internet voting to blockchain* .

Deliverables

By tomorrow afternoon at 3:00pm you must provide:

1. A 1 page (single sided) brief summarizing your findings and policy suggestions. You'll hand these to the judges when you present (4 copies).
2. A 6 minute presentation using 6 slides (total) presenting your findings to your local representatives and policy makers.

The material you present must: demonstrate an understanding of the cyber policy, identify key issues, include a policy response, and be clearly structured for your audience. See the attached score card for details of what the judges will be looking for.

Identifying Key Issues/Problem Definition

Identification and background on key issues with the right emphasis on immediate, intermediate and long-term factors.

- Score out of 20 –
- Comments:

Innovation and Originality

The incorporation of creative, innovative approaches that are applicable and appropriately scaled to the proposal

- Score out of 20 –
- Comments:

Situation Analysis

The strength of analysis concerning the problem to be solved; the consideration of all relevant stakeholders and users; the clarity and intelligibility in summarizing a complex mix of information; and the thoroughness in examining all factors relevant to the issue including the assessment of risk.

- Score out of 20 –
- Comments:

Analysis of Options and Steps to Implementation

Thoroughness, suitability and feasibility of the options presented; linkage of the options to the issue; and the inclusion of short, medium and long-term steps for implementation. Adherence to key elements of communications, consultation, collaboration and risk mitigation.

- Score out of 20 –
- Comments:

Organization of Material and Delivery

Clear and suitable style of presentation; the team's ability to stay on topic; employ an advice vs. advocacy approach; and demonstrate originality, creativity and a team-based approach.

- Score out of 10 –
- Comments:

Questions and Answers

Professionalism of response: e.g. clear, calm, reasoned and creative.
